Gaber®

Made in Italy

Contract Furniture

Gaber designs, develops and produces furniture for the contract world, responding to the needs of design, flexibility and quality thanks to the high level of expertise achieved in the molding of plastics and metal processing. Production efficiency, continuous research and great attention to details make it possible to create practical, versatile and long-lasting furnishing solutions.

The total customization at the service of the world of architecture and design make us the ideal partner to style and furnish different environments, all dedicated to hospitality and therefore to the well-being of people sharing moments of work, meeting and relaxation. Projects in which each product has its strong, distinctive features and is part of a furnishing system designed to interpret evolving needs, new times and new meeting places.

Gaber progetta, sviluppa e produce arredi per il mondo contract rispondendo a esigenze di design, flessibilità e qualità grazie all'altissima expertise raggiunta nello stampaggio di materie plastiche e nella lavorazione del metallo. Efficienza produttiva, ricerca continua e grande attenzione ai dettagli permettono di realizzare soluzioni di arredo pratiche, versatili e durature.

La totale customizzazione al servizio del mondo dell'architettura e del design ci rendono il partner ideale per arredare diversi ambienti, tutti orientati all'hospitality e quindi al benessere di persone che condividono momenti di lavoro, di incontro e di relax. Progetti in cui ogni prodotto ha un forte carattere distintivo e si inserisce in un sistema di arredo studiato per interpretare esigenze in divenire, nuovi tempi e nuovi luoghi di incontro.

As pure expression of Made in Italy, Gaber interprets that balance between craftsmanship and industry by creating furnishings able of satisfying the tastes and needs of its international audience, with a high level of customization and a wide range of finishes.

Pura espressione del Made in Italy, Gaber interpreta quell'equilibrio tra artigianato e industria che si realizza in arredi capaci di soddisfare gusti ed esigenze di un pubblico internazionale, con un alto livello di personalizzazione e ampia gamma di finiture.

IN THE NATURAL AND ETHICAL RESPECT

SUSTAINABLE PRODUCTS

Gaber designs, develops and produces furniture for the world of contract, responding to the needs of design, flexibility and quality thanks to the high level of expertise achieved in the molding of plastics and processing metal. Gaber both designs and produces, enabling the realization of innovative products that take into account both human and environmental safety. Since 2000, Gaber has avoided the use of pollutants and has instead encouraged the use of the most valued recycled materials. Gaber carefully launches products complying with the environmental laws in complete respect of the rules, thereby promoting the prevention of environmental pollution.

Safeguarding the environment and a continual search for eco-friendly solutions play an important role within our company where, in recent years, all new launches have been designed and manufactured with respect for our natural environment. This begins with the separate disposal of waste in both offices and on the factory floor: paper, cardboard, plastics, packaging, metal and glass are all separated out and recycled in other internal or external industrial processes, right up to self-sufficient energy production, thanks to the latest generation of photovoltaic (PV) solar panel systems.

PRODOTTI SOSTENIBILI

Gaber progetta, sviluppa e produce arredi per il mondo del contract, rispondendo alle esigenze di design, flessibilità e qualità grazie all'alto livello di competenza raggiunto nello stampaggio delle materie plastiche e nella lavorazione del metallo. Gaber progetta e produce complementi d'arredo di design, permettendo la realizzazione di prodotti innovativi che tengano sempre conto della sicurezza umana e ambientale. Dal 2000 Gaber ha evitato l'uso di sostanze inquinanti, incoraggiando invece, l'uso dei materiali riciclati. Gaber, sempre attenta al lancio sul mercato di prodotti conformi alle più severe leggi di salvaguardia dell'ambiente, promuovendo così la prevenzione dell'inquinamento ambientale.

La salvaguardia dell'ambiente e la continua ricerca di soluzioni eco-compatibili giocano un ruolo importante all'interno dell'azienda dove tutti i nuovi prodotti sono progettati e realizzati nel rispetto dell'ambiente naturale. Iniziando con lo smaltimento separato dei rifiuti negli uffici e nelle aree produttive: carta, cartone, plastica, imballaggi, metallo e vetro sono accuratamente separati e riciclati grazie a processi industriali sia interni che esterni e continua sino alla produzione autonoma di energia grazie ad impianti fotovoltaici di ultima generazione.

MATERIALS / MATERIALI

TECHNOPOLYMER / TECNOPOLIMERO

Gaber production employs exclusively high-tech thermoplastic materials, which are 100% recyclable. Each techno-polymer item is marked with a specific symbol, which shows the kind of polymer for a quick identification and a consequent recycling. Gaber produces plastic injected materials without added chemicals. These materials are purchased within the European Union, so Gaber is exempted from registration with ECHA agency (European Agency for Chemicals Substances), in the complete respect of "Reach Regulation". As far as possible, recycled plastics are sourced as a base raw material, recovered post-consumption.

La produzione Gaber impiega esclusivamente materiali termoplastici altamente innovativi, riciclabili al 100%. Ogni articolo in tecnopolimero è contrassegnato da un simbolo specifico, che identifica il tipo di polimero per una rapida identificazione ed un conseguente corretto riciclaggio. Gaber produce materiali in tecnopolimero iniettato senza aggiunta di sostanze chimiche. Questi materiali sono acquistati all'interno dell'Unione Europea, pertanto Gaber è esente dalla registrazione presso l'agenzia ECHA (Agenzia europea per sostanze chimiche), nel pieno rispetto del "Reach Regulation". Per quanto possibile, i materiali plastici riciclati vengono acquistati come materia prima di base, recuperati da post-consumo.

METAL / METALLO

Gaber metal structures, in the full respect of our natural environment, are available with "trivalent" chroming and painted finishes. Prime-quality special epoxy powder coating used on Gaber frames enhance color stability from batch to batch and over time, increasing its corrosion resistance and achieving excellent resistance to atmospheric agents.

Le strutture metalliche Gaber, nel pieno rispetto del nostro ambiente naturale, sono disponibili con cromature "trivalenti" e finiture verniciate. La speciale verniciatura a polvere epossidica di prima qualità utilizzata sui telai Gaber migliora la stabilità del colore da lotto a lotto e nel tempo, aumentandone la resistenza alla corrosione e ottenendo un'ottima resistenza agli agenti atmosferici.

WOOD / LEGNO

Wooden products are manufactured in accordance with the European Regulations in force regarding formaldehyde emissions from wood-based products (E1 according EN717-EN120). Gaber uses wooden raw materials coming from PEFC chain of custody certified materials.

I prodotti in legno sono realizzati in conformità alle Normative Europee vigenti in materia di emissioni di formaldeide da prodotti a base di legno (E1 secondo EN717-EN120). Gaber utilizza materie prime in legno provenienti da materiali certificati catena di custodia PEFC.

PACKAGING / PACKAGING

Corrugated paperboard carton boxes, printed with environmentally friendly inks, are made of at least 80% recycled and recyclable materials, coming from the chain custody FSC Recycled. Packaging is sized in order to optimize storage and transport requirements, both helping the environment and saving on transport costs.

Le scatole di cartone ondulato, stampate con inchiostri ecologici, sono realizzate di almeno l'80% con materiali riciclati e riciclabili provenienti dalla catena di custodia FSC Recycled. Gli imballi sono dimensionati in modo da ottimizzare le esigenze di stoccaggio e trasporto, sia a favore dell'ambiente che di risparmio sui costi di trasporto.

FUNCTION DESIGN AND SUSTAINABILITY / FUNZIONE DESIGN E SOSTENIBILITÀ

Compound Wood by Gaber is an advanced bio-composite where natural wood fibres are incorporated into a polyolefin matrix in order to produce a "Triple-way Ecological" material. This Triple Ecology is achieved by using wood shavings, in their turn completely recyclable, and without the need for any protective polluting treatments.

Compound Wood di Gaber è un Bio-Composito avanzato dove le fibre di legno naturali sono incorporate in una matrice poliolefinica per produrre un materiale "3 volte Ecologico". Ecologico 3 volte perché: utilizza derivati dalla lavorazione del legno, a loro volta completamente riciclabili e non necessita di trattamenti inquinanti protettivi del legno.

Gaber has received several awards for its sustainable Collections, including "Buygreen" award, a testament to Gaber's ongoing commitment to the innovation of its products and materials utilized.

Gaber ha ottenuto diversi riconoscimenti per le sue collezioni sostenibili, tra cui il premio "Buygreen", una testimonianza del continuo impegno di Gaber nell'innovazione dei suoi prodotti e dei materiali utilizzati.

Contract and sustainable furniture

Gaber technopolymer products are made with high quality raw materials: 100% recyclable and eco-friendly.

In the **"ZERO WASTE"** collection, Gaber products are made of completely recycled plastic material: 50% from post-consumer certified plastic waste (PCR) and 50% from industrial plastic waste (PIR).

PCR is an abbreviation for "Post Consumer Recycled" and is the raw material made from waste from the consumer/end user. PIR is an abbreviation for "Post Industrial Recycled" and is the raw material made from waste generated within the industry.

Our know-how, the use of energy generated from renewable sources, combined with the most modern technologies utilized by Gaber for the reduction and recycling of waste, creates long-lasting and functional products, which help to reduce the environmental impact of our work.

However, sustainability does not stop at the sole use of **"ZERO WASTE"** material: this material, in fact, at the end of the product's life cycle, remains totally recyclable and therefore usable to create new products, consequently eliminating material waste. Gaber is therefore at the centre of a circular economic model aimed at increasingly sustainable development, providing services that can improve people's lives and the environment, with a vision of the future aimed at promoting responsible behaviour.

I prodotti Gaber in tecnopolimero sono realizzati con materie prime di alta qualità: riciclabili al 100% ed eco-compatibili.

Nella collezione **"ZERO WASTE"** il prodotto Gaber è realizzato in materiale plastico completamente riciclato: 50% da scarto di materiale plastico certificato post consumo (PCR) e 50% da scarto di materiale plastico industriale (PIR).

PCR è l'abbreviazione di "Post Consumer Recycled" ed è un materiale che deriva da prodotti precedentemente utilizzati dai consumatori. PIR è invece l'abbreviazione di "Post Industrial Recycled" ed è un materiale totalmente riciclato dagli scarti creati dal produttore in fabbrica, recuperato prima di essere utilizzato dal consumatore.

Il nostro know-how, l'utilizzo di energia generata da fonti rinnovabili, unito alle più moderne tecnologie utilizzate da Gaber per la riduzione e il riciclaggio degli scarti, crea prodotti longevi e funzionali, che aiutano a diminuire a priori l'impatto ambientale del nostro lavoro. La sostenibilità non si ferma però al solo utilizzo di materiale **"ZERO WASTE"**: tale materiale, infatti, alla fine del ciclo di vita del prodotto rimane totalmente riciclabile e quindi utilizzabile per creare nuovi prodotti, eliminando di conseguenza gli sprechi di materiale.

Gaber si pone quindi al centro di un modello economico circolare volto ad uno sviluppo sempre più sostenibile, fornendo servizi in grado di migliorare la vita delle persone e dell'ambiente, con una visione del futuro volta a promuovere comportamenti virtuosi.

SAFE PRODUCTS / PRODOTTI SICURI

In all components, parts or materials used by Gaber to make its own products, be they plastic or metal, there are no dangerous substances within the certified limits of the following test methods reports:

In tutti i componenti, parti o materiali utilizzati da Gaber per realizzare i propri prodotti, siano essi plastici o metallici, non sono presenti sostanze pericolose nei limiti certificati dei seguenti metodi e rapporti di prova:

RESEARCH AND DEVELOPMENT / RICERCA & SVILUPPO

Gaber, aware of the need to implement courageous initiatives that respond to the ambitious sustainability programme, follows new innovation targets: the new headquarters, with fully centralized integrated automation, allows remote management to minimize any waste of energy and materials.

Particular attention has been paid to bringing back the green that characterizes our landscape: more than 6'000m² have been regenerated, transforming concrete squares and asphalt into parkland, with more than 650 new plants introduced in order to balance production needs with the surrounding environment.

Gaber, consapevole della necessità di implementare iniziative coraggiose che rispondano all'ambizioso programma di sostenibilità, ricorre a nuove dimensioni dell'innovazione: la nuova sede, integralmente controllata da domotica, permette anche la gestione da remoto per minimizzare lo spreco, di energia e di materia.

Particolare attenzione è stata dedicata al riportare il verde che caratterizza il nostro paesaggio: più di 6'000m² sono stati rigenerati, trasformando piazzali in cemento e asfalto in prati, integrando con più di 650 nuove piante l'area, al fine di equilibrare le necessità produttive con l'ambiente circostante.

RECYCLING UNIT

When a production chain works at its best, it also prevents the creation of waste, saves resources and reduces any impact on the environment. To ensure the sustainability of its activities, Gaber invests in latest generation technologies, thanks to which energy consumption is reduced and waste materials reused.

Gaber Recycling Unit is a division of Gaber that allows the recycling of plastic and metal materials from post-industrial consumption, automatically optimizing the separation of different raw materials, which are thus reused in subsequent production runs.

Quando una catena produttiva funziona al meglio, previene anche la creazione di rifiuti, risparmia risorse e riduce l'impatto nei confronti dell'ambiente. Per garantire la sostenibilità delle proprie attività, Gaber investe in tecnologie di ultima generazione, grazie alle quali viene ridotto il consumo di energia e vengono ri-utilizzate le materie di scarto.

Gaber Recycling Unit è una divisione di Gaber che permette il riciclo delle materie plastiche e metalliche da post consumo industriale, differenziando al meglio ed in modo automatico i diversi materiali componenti dei prodotti, che vengono così riutilizzati per una nuova produzione.

SALES CONDITIONS

- All prices are expressed in Euro (VAT excluded)
- All mentioned prices are on EX-works basis.
- Goods travel at customer's own risk.
- Minimum order quantity follows the packaging or multiply, unless otherwise specified. The first box per model must be complete; subsequent incomplete boxes incur a € 6,00 net surcharge.
- Minimum order amount: € 500,00 net. For smaller orders exceptionally accepted, anyway not lower than € 200,00, upcharge of € 25,00 net.
- Delivery time is approximate, unless differently agreed. Possible delays cannot justify any order cancellation or claim for damages.
- The goods sold through an extended payment are released under the conditions with property reserve until full settlement.
- For any dispute the place of jurisdiction will be the Court of Treviso, Italy.
- Possible complaints must be notified not later than 8 days from receipt of the goods.
- Gaber reserves the right to modify or upgrade the product without prior notice.

GABER® LITERATURE

All Gaber® literature contains technical information and use-suggestions for those who intend to purchase or already have bought items from the Gaber® range. For Customers' interest, the Company may modify its products without any prior notice. Drawings, quoted materials and catalogue colors and price-lists are shown as a guide only and subject to tolerances. Dimensions are provided also in inches (") as a guide only. The colors displayed in Gaber® literature, related to technopolymer finishing and coverings, fabrics, leather, lacquered or painted materials, wooden items, may change from time to time. Gaber® reserves the right to suspend the production of any of its products without any notice or reason. All rights of reproduction in whole or in part of Gaber® literature, related to text, images or illustration, or transmitted by any means, electronic or mechanical, including photocopying, recording or any information storage without written permission from Gaber®, are reserved worldwide.

MATERIALS, USE AND MAINTENANCE

Plastic Materials

The Techno Polymer Compounds Gaber® uses on its products are characterized by high structural resistance, heat and abrasion resistance. Gaber® technopolymers are non-toxic, stain resistant, antistatic and UV-resistant: thanks to all these features these materials have excellent resistance to atmospheric agents. All these materials are recyclable in the full respect of our Natural Environment. Gaber produces plastic injected materials without added chemicals and, as far as possible, recycled technopolymers are sourced as a base raw material, recovered post-consumption.

Guidelines for correct usage: To maintain the Gaber's techno-polymer products in perfect conditions through time and guarantee a long lasting quality of the raw materials we hereby recommend very basic care instructions to be followed. Cleaning advice: Techno-polymer surfaces usually need to be cleaned with a normal cloth and warm water; for the most persistent stains a small amount of liquid soap diluted in water may be used. We recommend strictly avoiding all types of abrasive substances, like for example powdered cleaning products, creams, scour pads and rough sponges. Gaber's techno-polymer products can be sanitized using different substances, for more information check on the web "polypropylene chemicals resistance compatibility"; the use of these substances also depends on the temperature, pressure and concentration. It is always a good practice, after sanitizing the techno-polymer products with these substances, rinse immediately the products with water. Any liquid spilt on the product must be wiped up immediately. Even products made especially for outdoor purposes could be affected by atmospheric agents. Products may undergo exterior changes due to particular exposure to heat, humidity and salinity. Products may change color and shade if exposed to direct sunlight. An appropriate and frequent maintenance and cleaning of the products enhances its durability. Maintenance has to be carried out by experienced staff.

Gaber® glides and floorpads are made of blended rubber for heavy-duty use and are designed to minimise noise. Certain Gaber® items come ready-fitted with felt floorpads, specifically for hard or especially delicate floors.

Gaber® manufactures some bespoke products of its collection with fire retardant techno polymer: the additives that make the fireproof plastic can substantially change the aesthetics and durability of the product.

Steel

High-resistance steel is used to produce frames for chairs, stools and tables by using square or round tubes as well as solid rod. Products are available in chrome or painted finishes. Special epoxy powder coating used on many Gaber® structures achieves excellent resistance to atmospheric agents.

Aluminum

Gaber® uses aluminum to produce frames for chairs, stools and tables. Aluminum surfaces can be anodized, and Gaber® uses this special treatment in order to increase resistance to corrosion.

Guidelines for correct usage: both steel and aluminum surfaces usually need to be cleaned with a normal cloth and warm water. For the most persistent stains, a small amount of mild liquid soap diluted in water may be used. Any liquid spilt on the product must be wiped up immediately. We recommend avoiding all types of abrasive creams or pastes, abrasive sponges, chlorine, bleach or strong detergents.

Wood

Our wooden products are produced in accordance with the European Regulations in force regarding formaldehyde emissions from wood-based products.

Guidelines for correct usage: Wooden products, being natural materials, can be damaged easily. Small impurities or imperfections are within quality standard range. Plywood surfaces need to be cleaned with a cloth and water. We recommend drying immediately after the cleaning process.

Flexible polyurethane padding

The flexible polyurethane cold-pressed paddings Gaber® uses on some of its upholstered products do not contain CFC/HCFC (ODP=0: do not contribute to the reduction of the atmospheric ozone layer), they are fire-retardant class 1-IM UNI 9175 / CMHR following European Standards.

Coverings: Fabrics and Leathers

Gaber® uses fabrics and leathers that belong to a wide range of colors and patterns, which are all tested in order to achieve the best performance, among which resistance to abrasion and artificial light. Fire-retardant fabrics and eco-leather upholstery are also available.

Guidelines for correct usage: Clean leathers with a soft cloth with water. Refer to technical specifications for fabric cleaning.

PACKAGING AND RECYCLING

Our packages are designed to optimize storage and transport requirements, they are made of 90% recycled raw material and are completely recyclable in themselves. The optimization of packaging in terms of volume and weight delivers a lower consumption of energy in many forms, helping the environment and a consequent saving on transport costs. In order to avoid the loss of components, packaging must be disposed only after completing the assembly of the products. Once the product has been dismantled, the product itself or its components must be given to public garbage system, according to local rules.

INNAPPROPRIATE USES OF THE PRODUCT

Avoid any improper use of the product; do not step on the product, do not stand on footrest or on armrests, do not seat on the back or on armrest, do not use the chair as a ladder. The product should not be subjected to swinging back and forwards that may damage the furniture or result in injury to the user. When lifting or moving the product, hold it by the main structure and not just under the seat. Gaber® will accept no liability for any damages caused to property or persons subsequent to incorrect or improper handling of the product. Gaber® also declines any responsibility in cases of damage caused to fragile floors.

CONDIZIONI GENERALI DI VENDITA

- I prezzi sono espressi in Euro (IVA esclusa)
- Resa della merce: franco fabbrica.
- La merce viaggia a rischio e pericolo del committente
- Ordine Minimo: pari all'imballo o multipli dello stesso, salvo diversamente specificato. Il primo imballo per ogni modello deve essere completo, ulteriori imballi incompleti subiranno un sovrapprezzo di € 6,00 netti.
- Importo minimo ordine: € 500,00 netti. Per ordini inferiori accettati eccezionalmente, comunque non inferiori a € 200,00, addebito di spese fisse per € 25,00 netti.
- I tempi di consegna sono indicativi salvo nostra conferma esplicita. Eventuali ritardi non possono dar luogo a pretese di danni o annullamenti dell'ordine.
- La merce venduta con pagamento dilazionato è rilasciata con condizioni di riserva di proprietà fino a completo pagamento.
- Per ogni controversia è competente il foro di Treviso, Italia.
- Eventuali reclami devono essere comunicati entro 8 giorni dal ricevimento della merce.
- Gaber si riserva la facoltà di apportare modifiche o migliorie senza alcun preavviso.

DOCUMENTAZIONE GABER®

La documentazione Gaber® contiene informazioni tecniche e consigli d'uso per chi vuole acquistare o possiede articoli facenti parte della gamma prodotti Gaber®. Nell'interesse della clientela, Gaber® si riserva il diritto di modificare i propri modelli in ogni momento, senza obbligo di preavviso. I disegni, le quote, i materiali ed i colori dei cataloghi e del listino Gaber® si intendono a titolo puramente indicativo, e soggetti a tolleranze. Le dimensioni in pollici (") sono da considerarsi indicative. I toni di colore rappresentati o presenti nelle palette colori e rivestimenti, relativi ai tessuti, alla pelle, alle laccature, ai vetri, e alle essenze legno, sono indicativi, in quanto passibili di variazioni da partita a partita. Gaber® declina ogni responsabilità in relazione a leggere differenze di tonalità. Gaber® si riserva inoltre il diritto di ritirare, sospendere o cessare la produzione di ogni singolo suo prodotto in qualsiasi momento e a sua discrezione senza darne preventivo avviso. Tutti i diritti di riproduzione, anche parziale, di cataloghi e listini Gaber® relativi a testi, immagini, illustrazioni, disegni, sia con mezzi meccanici che elettronici, incluso fotocopie o la formazione di sorgenti di informazione, senza il preventivo permesso scritto di Gaber®, sono globalmente riservati.

MATERIALI UTILIZZATI E MANUTENZIONE

Le Materie Plastiche

I compound di tecnopolimeri utilizzati da Gaber® nella realizzazione dei propri prodotti sono caratterizzati da un'elevata resistenza strutturale, termica e all'abrasione. Il tecnopolimero componente dei prodotti Gaber® è atossico, antimacchia, antistatico e anti-uv: qualità che lo rendono ottimamente resistente agli agenti atmosferici. I tecnopolimeri utilizzati da Gaber® sono integralmente riciclabili, nel pieno rispetto del nostro Ambiente Naturale. Gaber produce articoli termoplastici senza additivi chimici e, ove possibile, vengono utilizzati tecnopolimeri riciclati derivanti da post-consumo.

Piccole Accortezze: Per mantenere i prodotti Gaber in tecnopolimero in perfette condizioni nel tempo e garantire una qualità duratura delle materie prime, raccomandiamo di seguire le seguenti semplici istruzioni di utilizzo e manutenzione. Consigli per la pulizia: normalmente le superfici in tecnopolimero devono essere pulite con un normale panno e acqua calda; per le macchie più persistenti si può utilizzare una piccola quantità di sapone liquido diluito in acqua. Si consiglia di evitare rigorosamente tutti i tipi di sostanze abrasive, come ad esempio prodotti per la pulizia in polvere, creme, tamponi e spugne ruvide. I prodotti in tecnopolimero Gaber possono essere sanificati utilizzando diverse sostanze, per maggiori informazioni verificare sul web "compatibilità resistenza chimica polipropilene"; l'uso di queste sostanze dipende anche dalla temperatura, pressione e concentrazione. È sempre buona norma, dopo aver igienizzato i prodotti in tecnopolimero con queste sostanze, sciacquare immediatamente i prodotti con acqua. I liquidi versati sul prodotto devono essere asciugati subito. I prodotti destinati all'uso esterno subiscono comunque nel tempo l'azione degli agenti atmosferici. Eventuali alterazioni superficiali possono verificarsi a specifiche condizioni di temperatura, umidità e salinità. Il prodotto se esposto alla luce diretta del sole può essere soggetto a variazioni di colore. Una corretta e frequente manutenzione e pulizia aumentano la durabilità del prodotto. Interventi di manutenzione devono essere eseguiti da personale esperto.

I tappi e le protezioni dei prodotti Gaber® sono realizzati in una miscela di gomma ad alta resistenza all'usura, atta a diminuire il rumore da trascinamento. Alcuni prodotti Gaber® sono dotati di tappi con feltri, adatti a pavimenti rigidi e più delicati.

Gaber® realizza su commessa alcuni prodotti della propria collezione con tecnopolimeri ignifughi: gli additivi che rendono il manufatto plastico ignifugo possono variare sostanzialmente l'estetica e la resistenza del prodotto.

L' Acciaio

L'acciaio ad alta resistenza è utilizzato nelle strutture di tavoli, sedie e sgabelli, realizzati da Gaber® per mezzo di tubolari a sezione quadrata e rotonda, o con tondino. I prodotti sono disponibili con finitura cromata o verniciata. La speciale verniciatura a polveri epossidiche utilizzata da Gaber® per alcune strutture dei propri prodotti raggiunge una resistenza ottimale agli agenti atmosferici.

L' Alluminio

Gaber® utilizza l'alluminio per realizzare le strutture di tavoli, sedie e sgabelli. La finitura per mezzo del trattamento superficiale di anodizzazione, utilizzata in alcuni prodotti, ha lo scopo di aumentarne la resistenza alla corrosione.

Piccole Accortezze: sia le superfici metalliche in acciaio che in alluminio devono essere pulite con un panno umido e soffice imbevuto in acqua calda. Per le macchie più ostinate è possibile diluire in acqua del sapone neutro liquido con moderazione. Asciugare sempre dopo la pulizia con un panno morbido. Non usare creme o paste per pulire i metalli, non usare cloro, candeggina o detergenti aggressivi. Non usare paste o spugne abrasive che possano graffiare le superfici metalliche.

Il legno

I prodotti Gaber® con elementi in legno sono prodotti di accordo con le vigenti normative Europee rispetto alle emissioni di formaldeide.

"Compound-wood" è il particolare materiale utilizzato da Gaber® per la realizzazione dei prodotti Alhambra-Eco ed Epica-Eco. Questo materiale utilizza fibre di legno derivanti dagli stessi processi di produzione con cui Gaber realizza elementi in materiale legnoso. Niente viene sprecato.

Piccole Accortezze: Le superfici in legno, essendo un materiale naturale, potrebbero, nel tempo, subire alterazioni di colore con l'utilizzo e con l'esposizione alla luce. Inoltre, per loro natura, tali superfici sono facilmente danneggiabili, alcune piccole impurità e imperfezioni rientrano negli standard di qualità accettati. Le superfici in legno non possono sopportare fonti di calore dirette.

Pulire le superfici in legno con un panno umido e soffice, imbevuto in acqua tiepida. Asciugare immediatamente dopo la pulizia.

Le imbottiture in poliuretano flessibile

Le imbottiture di alcuni prodotti Gaber® sono realizzate in poliuretano flessibile, stampato a freddo, privo di CFC/HCFC (ODP=0: non contribuisce alla riduzione dello strato di ozono atmosferico), autoestinguente classe 1-IM Uni 9175 / CMHR, seguendo le normative Europee in materia.

I rivestimenti: tessuti e pelli

Tessuti e Pelli utilizzati da Gaber® appartengono ad un'ampia gamma di colori e trame, tutti scelti tra un range di prodotti testati con l'obiettivo di ottenere le migliori caratteristiche prestazionali, quali la resistenza all'abrasione, allo sfregamento e alla resistenza alla luce artificiale. Sono disponibili categorie di tessuti ignifughi e rivestimenti in finte pelli.

Piccole Accortezze: pulire le Pelli con un panno bianco umido di sola acqua. Per la pulizia dei tessuti consultare la scheda tecnica specifica.

IMBALLI E RICICLO

I nostri imballi sono realizzati con l'obiettivo di ottimizzare trasporti e stoccaggio: sono realizzati per il 90% di materiali riciclati e totalmente riciclabili. L'ottimizzazione dell'imballo in termini di volume e peso comporta un minore dispendio di energia, con un conseguente risparmio nei costi di trasporto e un importante aiuto alla salvaguardia del nostro Ambiente Naturale. E' consigliabile lo smaltimento degli imballi solo a completamento dell'assemblaggio, onde evitare lo smarrimento di eventuale ferramenta e componenti. Una volta dismesso, il prodotto o i suoi componenti vanno conferiti ai sistemi pubblici di smaltimento secondo quanto previsto dalla legislazione locale in vigore.

USO IMPROPRIO DEI PRODOTTI

Sono da considerarsi usi impropri e/o scorretti del prodotto il salire in piedi su tavoli, sedie, sgabelli, poggiapiedi, sedersi su schienali, braccioli, utilizzare i prodotti come scaletta. Evitare oscillazioni che potrebbero pregiudicare il funzionamento e la sicurezza dell'utente. Per sollevare o spostare un prodotto non afferrare sotto il sedile, bensì afferrare saldamente la struttura portante. Il prodotto non deve essere sottoposto a carichi decentrati, è stato progettato per essere utilizzato in condizioni normali di appoggio (su quattro gambe o sulla base). Gaber® declina ogni responsabilità per danni causati a cose o a persone derivanti da uso non corretto del prodotto; l'azienda inoltre si solleva da ogni responsabilità per danni provocati su pavimenti e superfici delicate o tenere.

CONDICIONES GENERALES DE VENTA

- Todos los precios son en Euro (IVA no incluido)
- Portes: debidos (ex-works)
- Toda la mercancía viaja por cuenta y riesgo del comprador.
- Cantidad mínima por cada pedido: igual al embalaje o múltiplo de lo mismo, a menos que se especifique lo contrario. El primer empaque para cada modelo debe estar completo, los paquetes incompletos tendrán un coste adicional de € 6,00 netos.
- Valor mínimo de pedido: € 500,00 netos. Para pedidos inferiores, excepcionalmente aceptados, y del valor mínimo de € 200,00 netos hay un coste fijo extra de € 25,00 netos.
- Los plazos de entrega son indicativos, excepto si los mismos han sido establecidos por parte de nuestra empresa. En caso de retraso en la entrega no se aceptan cancelaciones de pedidos o peticiones de reembolso.
- La mercancía vendida con pago diferido, se entrega con derecho de reserva de propiedad hasta el pago total de la misma.
- Para cualquier queja, el foro de competencia es el de Treviso, Italia.
- No se admiten reclamaciones efectuadas con posterioridad a los 8 días de la entrega de la mercancía.
- Gaber se reserva el derecho de poder modificar o mejorar sus productos sin previo aviso.

DOCUMENTACION GABER®

Toda la documentación Gaber® contiene una serie de informaciones técnicas y consejos para el usuario para quien quiera comprar o para quien posea productos pertenecientes a la gama Gaber®. En el interés de los clientes, Gaber® se reserva el derecho de poder modificar o mejorar sus productos sin avisar antes.

Los dibujos, las medidas, los materiales y los colores se ilustran exclusivamente a modo de ejemplo y son indicativas, sujetos a tolerancias. Las tonalidades de los colores del muestrario relativas a las telas, pieles, pintura, esencias de las maderas, pueden variar según partida.

Gaber® declina todo tipo de responsabilidades con relación a pequeñas diferencias de color. Gaber® se reserva además el derecho de retirar, suspender o cesar la producción de cualquier producto en cualquier momento y a propia discreción sin dar previo aviso.

Todos los derechos de reproducción, incluso parcial, de los catálogos y listas de precios Gaber® relativos a los textos, imágenes, ilustraciones, diseños ya sea por medios mecánicos o electrónicos, incluyendo el fotocopiado o la formación de fuentes de información, sin el permiso previo por escrito de Gaber®, son reservados a nivel mundial.

MATERIALES, USO Y MANTENIMIENTO

Material Plástico

Tecno Polímeros compuestos que Gaber® utiliza en sus productos se caracterizan por una alta resistencia estructural, al calor y una alta resistencia a la abrasión. Los Tecno Polímeros de Gaber® no son tóxicos, son resistentes a manchas, antiestáticos y UV-resistente: gracias a esto los materiales tienen una excelente resistencia a los agentes atmosféricos. Todos estos materiales son reciclables en el pleno respeto de nuestro medio ambiente. Gaber® produce plástico inyectado sin productos químicos y materiales añadidos y, cuando sea posible, tecnopolímeros reciclados se obtienen como materia prima básica, recuperado de post-consumo.

Pequeñas atenciones a: Para mantener los productos de tecnopolímero de Gaber en perfectas condiciones y garantizar una calidad duradera de las materias primas, recomendamos seguir unas instrucciones de cuidado muy básicas. Consejos de limpieza: Las superficies de tecnopolímero generalmente deben limpiarse con un paño normal y agua tibia; para las manchas más persistentes se puede utilizar una pequeña cantidad de jabón líquido diluido en agua. Recomendamos evitar estrictamente todo tipo de sustancias abrasivas, como, por ejemplo, productos de limpieza en polvo, cremas, estropajos y esponjas rugosas. Los productos de tecnopolímero de Gaber se pueden desinfectar con diferentes sustancias. Para obtener más información, consulte en la web "compatibilidad de resistencia a productos químicos de polipropileno"; el uso de estas sustancias también depende de la temperatura, presión y concentración. Siempre es una buena práctica, después de desinfectar los productos de tecnopolímeros con estas sustancias, enjuagar inmediatamente los productos con agua. Cualquier fracción de líquido sobre el producto debe ser borrado de inmediato. Incluso los productos hechos especialmente para el exterior podrían ser afectados por los agentes atmosféricos. Productos podrían someterse a posibles cambios en la exposición especial al calor, la humedad y la salinidad. En casos excepcionales y para una vida larga, los productos podrían cambiar de tonalidad y sombra, si se expone a fuerte luz solar directa. Un mantenimiento y limpieza adecuada y frecuente de los productos aumenta su durabilidad. Mantenimiento tiene que llevarse a cabo por personal de experiencia.

Los tapones de los productos Gaber® están hechos de un compuesto de goma de alta resistencia al desgaste, que reduce el ruido de arrastre. Algunos productos Gaber® están equipados con tapones con fieltro, adecuados para suelos duros y más delicados.

Gaber® fabrica sobre pedido algunos productos de su colección con tecnopolímero retardante de fuego: los aditivos que hacen que el producto de plástico sean a prueba de fuego pueden variar sustancialmente la estética y la durabilidad del producto.

Acero

Acero de alta resistencia se utiliza para producir las estructuras de las sillas y de las mesas, utilizando tubos cuadrados o redondos, así como barilla sólida. Los productos están disponibles en cromo o acabados pintados. La pintura en polvo epoxi especial, utilizada en muchas estructuras Gaber®, logra una excelente resistencia a los agentes atmosféricos.

Aluminio

Gaber® utiliza aluminio, ligero y resistente, para producir estructuras para las sillas y las mesas. Superficies de aluminio pueden ser anodizado, y Gaber® utilizan este tratamiento especial con el fin de aumentar la resistencia a la corrosión.

Pequeñas atenciones a: tanto las superficies de aluminio que acero se deben limpiar con un paño normal y agua tibia. Para las manchas más persistentes se puede usar una pequeña cantidad de jabón líquido suave diluido en agua. Cualquier fracción de líquido sobre el producto debe ser borrado de inmediato. Se recomienda evitar todo tipo de cremas abrasivas o pastas, esponjas abrasivas, cloro, lejía o detergentes fuertes.

Las Maderas

Nuestros artículos de madera se producen de acuerdo con la normativa europea vigente en materia de emisiones de formaldehído de los productos a base de madera. Gaber utiliza materias primas de madera que vienen exclusivamente de la cadena de custodia PEFC de materiales certificados.

Pequeñas atenciones a: artículos de madera, siendo materiales naturales, podrían dañarse fácilmente. Las pequeñas impurezas o imperfecciones están dentro del rango estándar de calidad. Superficies de madera moldeada deben ser limpiadas con un paño y agua. Se recomienda secar inmediatamente después del proceso de limpieza.

Espumas

Gaber® utiliza en algunos de sus artículos tapizados una espuma de poliuretano inyectada dentro de un molde, toda las espumas no contienen CFC / HCFC (ODP = 0: no contribuyen a la reducción de la capa de ozono de la atmósfera), y son de clase ignífugo 1-IM Uni 9175 siguiendo Normas europeas.

Revestimientos: Telas y Piel

Gaber® utiliza tela y piel que pertenecen a una amplia gama de colores y diseños, que son todos probados a fin de lograr las mejores prestaciones, entre las que la resistencia a la abrasión y la luz artificial. Telas ignífugas y para exterior, tapicería en eco-piel, también están disponibles.

Pequeñas atenciones a: limpias pieles con un paño suave con agua. Consulte las especificaciones técnicas de limpieza para las telas.

EMPAQUE Y RECICLABILIDAD

La gama de productos Gaber® está constituida por la mayor parte de elementos completamente reciclables. Nuestros embalajes se escalan con el fin de optimizar los requisitos de almacenamiento y de transporte, que están hechos de 90% materia prima reciclada y son totalmente reciclables. La optimización de los embalajes en términos de volumen y peso ofrece un menor consumo de energía en muchas formas, ayudando al medio ambiente y el consiguiente ahorro en los costes de transporte. A fin de evitar la pérdida de componentes, el embalaje debe eliminarse sólo después de completar el montaje de los productos. Una vez que el producto ha sido desmantelado, el propio producto o sus componentes se debe dar a sistema público de reciclaje, de acuerdo con las normas locales.

USOS INADECUADO DEL PRODUCTO

Evite cualquier uso inadecuado del producto; no subir/caminar sobre el producto, no se pare en el reposapiés o en los brazos, no sentarse en el espaldar o en el reposabrazos, no utilice la silla como una escalera. El producto no debe ser sometido a pesos desequilibrados, ya que está diseñado para un descanso adecuado en el punto de apoyo (en cuatro patas o en la base). Cuando levante o mueva el producto, manténgalo en la estructura principal y no sólo bajo el asiento. Gaber® aceptará ninguna responsabilidad por los daños y perjuicios causados a bienes o personas posteriores a un manejo incorrecto o inadecuado del producto. Gaber® se libera de cualquier responsabilidad en caso de daños causados a los suelos frágiles.

CONDITIONS GENERALES DE VENTE

- Les prix sont en Euro (H.T.).
- Marchandise vendue départ usine.
- La marchandise voyage sous la responsabilité du client.
- Commande minimum: nous demandons de respecter le colisage indiqué et ses multiples, sauf en cas de confirmation explicite de notre part. Le premier colisage pour chaque modèle doit être complet, tout décolisage exceptionnel sera suivi d'un surcout de € 6,00 net.
- Minimum de commande € 500,00 net achat H.T. Pour toute commande acceptée exceptionnellement inférieure à ce montant et de tout façon non inférieure à € 200,00, nous ajouterons € 25,00 de frais fixe.
- Les délais de livraison sont indicatifs, sauf en cas de confirmation explicite de notre part. Tout retard n'est pas imputable et ne pourra pas donner lieu à une demande de dédommagement ou à l'annulation de la commande en cours.
- Gaber se réserve le droit de propriété sur la marchandise en cas de paiement échelonné, tant que la dernière échéance n'a pas été honorée.
- Pour toute contestation, le tribunal de compétence sera Treviso, Italia.
- Tous dommages ou manquants doivent être signalés par mail ou fax dans les 8 jours qui suivent la livraison.
- Gaber se réserve le droit de modifier ses modèles, à n'importe quel moment, sans aucun préavis.

DOCUMENTATION GABER®

Notre documentation contient des informations techniques et des conseils pour l'utilisation des produits, pour les futurs clients Gaber® ou pour qui est déjà en possession d'un produit Gaber®. Dans l'intérêt de la clientèle, Gaber® se réserve le droit de modifier ses modèles, à n'importe quel moment, sans aucun préavis.

Les dessins, les descriptions, les cotes, les matériaux et les couleurs du catalogue et du tarif sont purement indicatifs et sous réserve des tolérances. Les dimensions en pouce sont indicatives. Les tonalités des couleurs qui sont représentées sur la carte couleur, relatives aux tissus, au cuir, au polipropylène, aux essences de bois sont purement indicatives car elles peuvent varier d'un lot à un autre. Gaber® décline toute responsabilité en ce qui concerne toute différence de tonalité.

Gaber® se réserve le droit de retirer, de suspendre ou de cesser la production de tout article, sans aucun préavis. Tout droit de reproduction, même partielle, des catalogues, relatifs aux textes, images, illustrations, dessins, par des moyens mécaniques, électroniques, par photocopie, ou autre source d'information, sans le consentement préalable de Gaber®, est réservé.

MATERIAUX UTILISES ET LEUR ENTRETIEN

Matière plastique

Les billes de technopolymère utilisées par Gaber® pour fabriquer ses produits ont les caractéristiques suivantes : résistance structurelle thermique et à l'abrasion. Le technopolymère est non toxique, il est anti statique et anti UV ; ces qualités le rendent très résistant aux agents atmosphériques. Le technopolymère est entièrement recyclable, dans le respect de la charte écologique.

Quelques informations pour l'entretien : pour maintenir les produits techno-polymères Gaber dans des conditions parfaites et garantir une qualité durable des matières premières, nous recommandons par la présente des instructions d'entretien très basiques à suivre. Conseils de nettoyage: Les surfaces en technopolymère doivent généralement être nettoyées avec un chiffon normal et de l'eau tiède; pour les taches les plus tenaces, une petite quantité de savon liquide dilué dans l'eau peut être utilisée. Nous vous recommandons d'éviter strictement tous les types de substances abrasives, comme par exemple les produits de nettoyage en poudre, les crèmes, les tampons de score et les éponges rugueuses. Les produits technopolymères de Gaber peuvent être désinfectés à l'aide de différentes substances, pour plus d'informations, consultez le site Web «Compatibilité de résistance aux produits chimiques du polypropylène»; l'utilisation de ces substances dépend également de la température, de la pression et de la concentration. C'est toujours une bonne pratique, après avoir désinfecté les produits technopolymères avec ces substances, rincer immédiatement les produits à l'eau. Le liquide versé sur un plateau doit être immédiatement essuyé, les articles réservés à un usage externe peuvent subir à la longue l'action d'agents atmosphériques, tels que la salinité, l'humidité, les rayons de soleil, qui peuvent en altérer la superficie et la couleur. Nous recommandons un entretien régulier ainsi qu'un nettoyage correcte et fréquent, ce qui augmentera la durée de vie du produit. L'entretien doit être effectué par des personnes expertes.

Les bouchons des produits Gaber® sont faits d'un composé en caoutchouc à haute résistance d'usure, qui réduit aussi le bruit de trainée. Certains produits Gaber® sont équipés de bouchons avec feutre, adaptés aux sols durs et plus délicats.

Gaber® réalise sur demande, certains articles de sa collection, en polymère "ignifugé"; cependant les additifs qui rendent le produit plastique "ignifugé" peuvent en varier l'esthétique et la résistance.

Acier

L'acier utilisé pour la fabrication des structures de tables, chaises, et tabourets Gaber® est très résistant. Il est travaillé sous forme de tube à section carrée ou ronde. La finition peut être chromée ou vernie. Le vernissage spécial à époxy, utilisé par Gaber®, a une résistance optimale aux agents atmosphériques.

Aluminium

L'aluminium anodisé utilisé pour la réalisation de structures de tables, chaises et tabourets augmente la résistance à la corrosion. Conseil d'entretien pour les surfaces en acier et/ou en aluminium: nettoyer avec un chiffon doux, humide, imprégné d'eau chaude. Pour les taches éventuelles, on peut ajouter un peu de détergent à usage domestique. Il est recommandé de bien sécher la surface ensuite. Il ne faut pas utiliser de pâte et/ou crème pour métal, il ne faut pas utiliser de chlore, de javel ou autre détergents agressifs. Il ne faut pas utiliser de pâte ou d'éponges abrasives, qui pourraient endommager les rayants, les superficies.

Bois

Les articles Gaber® avec bois, sont fabriqués selon les normes européennes en vigueur, sans formaldéhyde. (par rapport à l'émission de formaldéhyde). Le matériel utilisé pour la fabrication des articles ALHAMBRA ECO et EPICA ECO est un mélange de sciure de bois rendu compact et dérivant de matériel recyclé. Il n'y a ainsi aucun gaspillage. Le bois étant une matière naturelle, peut, avec le temps et suivant l'exposition à la lumière, subir de légères modifications au niveau de la couleur. Ces produits, de par leur nature, peuvent s'abîmer facilement ; nous tenons aussi à préciser que certaines imperfections correspondent à un standard normal de qualité. Il est recommandé enfin, de ne pas approcher la superficie à une source de chaleur directe. Les superficies se nettoient à l'aide d'un chiffon doux, légèrement humide. Sécher toujours ensuite.

Rembourrage en polyuréthane « flexible »

Le rembourrage de certains articles Gaber® est réalisé en polyuréthane « flexible », injecté à froid, sans particules de CFC/HCFC (ODP=0, ne réduit pas la couche d'ozone), ignifugé en classe 1-IM UNI 9175 / CMHR, selon les normes européennes en vigueur.

Revêtement : tissus et cuir

Gaber® a au choix une large gamme de couleurs et de trames, choisis parmi des tissus, des cuirs, des écopelle testés et garantissant une bonne résistance aux frottements, aux abrasions, à la lumière artificielle. Nous avons aussi une gamme de revêtements non feu.

Informations et entretien : nettoyer les peaux avec un chiffon blanc, légèrement humide. Pour l'entretien des tissus, consulter la fiche technique, spécifique.

EMBALLAGE ET RECYCLAGE

Nos emballages sont conçus de façon à optimiser le transport et le stockage ; ils sont réalisés à 90% avec du matériel recyclé et sont complètement recyclables. L'emballage, optimisé au maximum en ce qui concerne son volume et son poids, permet une économie d'énergie, de main d'œuvre et de coût de port, sans oublier la sauvegarde de notre environnement. Il est vivement conseillé de monter complètement l'article Gaber® avant de procéder à l'élimination du carton, ceci, afin d'éviter de perdre la visserie et / ou les divers composants de l'article en question.

Lorsqu'un produit Gaber® arrive en fin de vie, il est recommandé de porter les diverses parties qui le compose à la déchèterie, selon la loi du pays en vigueur

USAGE INCORRECT DES PRODUITS

Les tables, chaises, tabourets ou repose pieds ne sont pas fait pour monter dessus, il ne faut pas s'asseoir sur les dossiers ou les accoudoirs ou se servir de ces articles comme d'un escabeau. Il faut éviter de se balancer d'avant en arrière sur les assises, de façon à éviter les accidents. Pour soulever ou déplacer une chaise ou tabouret, il est recommandé de le prendre par le châssis et non par l'assise. Le produit ne doit pas être soumis à des charges excessives ou décentrées, il a été conçu pour un usage normal de simple appui (sur 4 pieds ou sur pied central).

Gaber® décline toute responsabilité pour les dommages causés à personne ou choses, qui pourraient dériver d'un usage incorrect du produit. L'usine décline aussi toute responsabilité pour les dommages sur parquets ou sol délicats.

ALLGEMEINE VERKAUFSBEDINGUNGEN

- Die Preise werden in Euro ausgedrückt (MwSt. ausgeschlossen)
- Die Rückgabe der Ware erfolgt ab Werk
- Die Ware reist auf Gefahr des Auftraggebers
- Sofern nicht anders angegeben, entspricht die Mindestbestellmenge der Verpackung bzw. mehrfachen dergleichen. Die erste Verpackung muss vollständig sein. Für andere unvollständige Verpackungen wird ein Aufpreis von € 6,00 angerechnet.
- Der Mindestnettobetrag der Bestellung beträgt € 500,00. Bestellungen mit niedrigeren Beträgen werden ausnahmsweise angenommen. Jedenfalls dürfen diese den Nettobetrag von € 200,00 nicht unterschreiten und es werden zusätzlich Fixkosten in Höhe von € 25,00 angerechnet.
- Die Lieferzeiten gelten als reine Orientierung. Bei Verspätungen können keine Schadensersatzansprüche geltend gemacht oder die Bestellung storniert werden.
- Ein Zahlungsaufschub wird unter Eigentumsvorbehalt der Ware bis zur vollständigen Bezahlung gewährt.
- Für eventuelle Streitigkeiten oder Auseinandersetzungen ist das Forum von Treviso (Italien) zuständig.
- Eventuelle Beschwerden müssen innerhalb von 8 Tagen ab Erhalt der Ware mitgeteilt werden.
- Gaber behält sich das Recht Änderungen und Verbesserungen an der Ware, auch ohne Vorankündigung, vorzunehmen.

GABER® DOKUMENTATION

Die Dokumentation von Gaber® beinhaltet technische Informationen und Ratschläge zur Nutzung von Gaber® Produkte für Kaufinteressenten bzw. für Besitzer von Artikeln, die zur Produktpalette der Gaber® angehören. Im Interesse der Kunden behält sich Gaber® das Recht vor die eigenen Modelle jederzeit abzuändern, ohne Pflicht zur Vorankündigung. Die Zeichnungen, die Quoten, die Materialien und die Farben der Kataloge und der Preislisten der Gaber® dienen lediglich als Information und unterliegen Toleranzen. Die Maßen, die in Zoll angegeben sind, sind als Richtwerte zu betrachten. Die dargestellten Farbtöne, auch die in den Farbpaletten, sowie die Stoff-, Leder-, Lack-, Glas- und Holzverkleidungen sind Indikativ, da von Fall zu Fall Änderungen möglich sind. Gaber® lehnt jegliche Verantwortung in Verbindung mit Farbtonabweichungen ab. Gaber® behält sich zudem das Recht vor die Produktion jedes einzelnen Produkts zurückzuziehen, einzustellen bzw. abzutreten. Die Rechte an der Reproduktion von Kataloge und Preislisten der Gaber® in Bezug auf Texte, Bilder, Illustrationen, Zeichnungen, die sowohl mit mechanischen als auch mit elektronischen Mitteln, Kopien inbegriffen, erfolgen sind weltweit der Gaber® vorbehalten und benötigen eine schriftliche Genehmigung der Gaber®.

VERWENDETE MATERIALIEN UND WARTUNG

Kunststoffmaterialien

Die von Gaber® benutzte „Technopolymer-Verbindung“ für die Realisierung der eigenen Produkte sind durch hohe strukturelle, thermische und abriebfeste Resistenz gekennzeichnet. Das „Technopolymer“, welcher Bestandteil der Produkte Gaber® ist, ist ungiftig, schmutzabweisend, antistatisch und anti-UV: Eigenschaften, die der Produkte Gaber® eine optimale Resistenz gegen die atmosphärischen Einflüsse verleiht. Die verwendeten „Technopolymer“ sind, in Beachtung der Umwelt, vollständig recycelbar. Gaber® produziert thermoplastische Artikel ohne chemische Zusätze und, wo möglich, wird recyceltes „Technopolymer“ aus wiederverwendeten Altstoffen benutzt.

Richtlinien für die korrekte Verwendung: Richtlinien für die korrekte Verwendung: Um die Technopolymerprodukte von Gaber während der gesamten Zeit in einwandfreiem Zustand zu halten und eine lang anhaltende Qualität der Rohstoffe zu gewährleisten, empfehlen wir hiermit grundlegende Anweisungen zur Pflege. Reinigungshinweise: Technopolymeroberflächen müssen normalerweise mit einem normalen Tuch und warmem Wasser gereinigt werden. Für die hartnäckigsten Flecken kann eine kleine Menge in Wasser verdünnter Flüssigseife verwendet werden. Wir empfehlen, alle Arten von Schleifmitteln, wie z. B. pulverförmige Reinigungsprodukte, Cremes, Scorepads und grobe Schwämme, strikt zu vermeiden. Gabers Technopolymerprodukte können mit verschiedenen Substanzen desinfiziert werden. Weitere Informationen finden Sie im Internet unter „Verträglichkeit der Beständigkeit gegen Polypropylen-Chemikalien“. Die Verwendung dieser Substanzen hängt auch von der Temperatur, dem Druck und der Konzentration ab. Es ist immer eine gute Praxis, nach dem Desinfizieren der Technopolymerprodukte mit diesen Substanzen die Produkte sofort mit Wasser zu spülen. Es sollte zudem nicht mit Schleif- bzw. Lösungsmittel in Kontakt treten oder mit grobe Reinigungsgeräte. Die auf die Produkte Gaber® verschütteten Flüssigkeiten müssen sofort abgetrocknet werden. Produkte, die für den Außenbereich bestimmt sind, erleiden mit der Zeit die wetterbedingten Einwirkungen. Eventuelle oberflächliche Änderungen können aufgrund bestimmter Temperatur-, Feuchtigkeits- oder Salzgehaltsbedingungen auftreten. Eine direkte Sonneneinstrahlung kann eine Farbänderung des Produktes verursachen. Eine korrekte und regelmäßige Wartung erhöht die Haltbarkeit des Produkts. Wartungsmaßnahmen sollten von einem spezialisierten Personal vorgenommen werden. Die Kappen und Schutzvorrichtungen der Gaber®-Produkte sind in einer Gummimischung mit hoher Verschleißfestigkeit gemacht, zur Reduzierung von Schleppgeräuschen. Einige Gaber®-Produkte sind Filzstöpseln ausgestattet, die für starre und empfindlichere Böden geeignet sind.

Gaber® realisiert auf Anfrage einige Produkte der eigenen Kollektion mit feuerfesten „Technopolymer“: die Zusatzstoffe, die das Kunststoffmaterial feuerfest machen, können die Ästhetik und die Resistenz der Produkte grundlegend verändern.

Die Kappen und Schutzvorrichtungen der Gaber-Produkte sind in einer Gummimischung mit hoher Verschleißfestigkeit gemacht, zur Reduzierung von Schleppgeräuschen. Einige Gaber-Produkte sind Filzstöpseln ausgestattet, die für starre und empfindlichere Böden geeignet sind.

Der Stahl

Bei den Strukturen von Tischen, Stühlen und Hockern wird hochfester Stahl verwendet, diese werden von Gaber® mittels rund- bzw. quadratförmige Röhre realisiert. Die Produkte sind in verchromter oder lackierter Ausführung erhältlich. Die spezielle Lackierung aus Epoxidpulver, die von Gaber® an vielen Strukturen verwendet wird, erreicht eine optimale Resistenz gegen die atmosphärischen Einflüsse.

Das Aluminium

Gaber® benutzt das Aluminium für die Realisierung der Strukturen von Tischen, Stühlen und Hockern. Mittels einer speziellen Verarbeitung der Oberflächen einiger Produkte Gaber®, des Anodisieren, wird die Korrosionsresistenz erhöht. Richtlinien für die korrekte Verwendung: sowohl die Stahl- als auch die Aluminiumoberflächen müssen mit einem feuchten und weichen Tuch, durchtränkt in heißem Wasser, gereinigt werden. Für die hartnäckigsten Flecken kann man mit Vorsicht eine neutrale flüssige Seife in Wasser verdünnen. Nach der Reinigung sollte die Oberfläche immer mit einem weichen Tuch abgetrocknet werden. Verwenden Sie keine Cremes oder Pasten um die Metalle zu reinigen, sowie kein Chlor, Bleichmittel oder sonstige aggressive Reinigungsmittel. Benutzen Sie auch keine groben Pasten oder schleifende Schwämme, die die Metalloberflächen verkratzen könnten.

Das Holz

Die Produkte Gaber® mit Holzelemente werden in Übereinstimmung mit den geltenden europäischen Vorschriften bezüglich der Emission von Formaldehyd hergestellt. „Compound-Wood“ ist das besondere Material, das von Gaber® für die Realisierung der Produkte „Alhambra-Eco“ und „Epica-Eco“, verwendet wird. Dieses Material benutzt die Holzfasern aus dem Produktionsprozess, mit welchem Gaber® die Holzelemente herstellt. Es wird nichts verschwendet. Richtlinien für die korrekte Verwendung: Die Holzoberfläche kann mit der Zeit durch die Benutzung oder die Sonneneinstrahlung eine Farbänderung erleiden, da es sich um ein natürliches Material handelt. Zudem sind die Oberflächen, aufgrund Ihrer Natur, leicht zu beschädigen. Einige kleine Unreinheiten und Macken liegen im annehmbaren Qualitätsstandard. Die Holzoberflächen vertragen keine direkte Wärmezufuhr. Reinigen Sie die Holzoberflächen mit einem feuchten und weichen Tuch, durchtränkt in lauwarmes Wasser. Trocknen Sie das Produkt sofort nach der Reinigung.

Polsterung in flexibles Polyurethan

Die Polsterung einiger Produkte von Gaber® besteht aus flexiblem Polyurethan, kaltgepresst, ohne CFC/HCFC (ODP=0: es trägt nicht zur Reduzierung der atmosphärischen Ozonschicht bei), selbstlöschend der Klasse 1-IM UNI 9175/CMHR, gemäß der geltenden europäischen Vorschriften.

Die Bezüge: Stoffe und Leder

Gaber® verwendet Stoffe und Leder, die zu einer umfassenden Palette an Farben und Mustern gehören, die alle aus einer Reihe getesteter Produkte ausgewählt wurden, mit dem Ziel die beste Leistung wie die Abriebfestigkeit und Resistenz gegen künstliches Lichtes zu erzielen. Es sind Kategorien feuerfester Stoffe und künstliche Lederbezüge erhältlich. Richtlinien für die korrekte Verwendung: Reinigen Sie das Leder mit einem weißen Tuch, der nur mit Wasser befeuchtet werden sollte.

VERPACKUNG UND RECYCLING

Unsere Verpackungen wurden mit dem Ziel realisiert den Lager und Transport zu optimieren. Sie bestehen zu 90% aus recycelten Materialien und sind vollständig recycelbar. Die Optimierung der Verpackung in Bezug auf Volumen und Gewicht führt zu einem geringeren Energieverbrauch, mit einer folgenden Einsparung bei den Transportkosten und einer wichtige Hilfe zum Schutz der Umwelt. Um den Verlust von Bauteilen zu vermeiden, wird es empfohlen die Verpackung erst nach Abschluss der Montage der Produkte zu entsorgen. Nach der Montage kann das Produkt oder seine Bestandteile dem öffentlichen Entsorgungssystem gemäß den geltenden örtlichen Vorschriften übergeben werden.

UNSACHGEMÄSSE VERWENDUNG DES PRODUKTS

Als eine unpassende bzw. unkorrekte Verwendung des Produkts wird folgendes angesehen: auf Tische, Stühle und Hockern aufstehen, auf Rücken- und Armlehnen niedersetzen, die Produkte als Treppchen zu nutzen. Das Schwenken des Produktes könnte das Produkt oder dessen Funktion beschädigen und die Sicherheit des Nutzers gefährden. Um das Produkt anzuheben oder zu verschieben wird empfohlen es an der Hauptstruktur und nicht unter dem Sitz zu halten. Das Produkt sollte keiner dezentralen Last ausgesetzt sein, da es für die Nutzung in normalen Konditionen geplant wurde. Gaber® übernimmt keine Haftung für Schäden an Sachen oder Personen, die durch unsachgemäße Verwendung des Produkts verursacht wurden. Gaber® lehnt zudem jede Haftung für Schäden an empfindlichen Böden oder Oberflächen ab.

Panky is the modular and customisable seating system for furnishing waiting and reception areas, based on the 2027 trestle frame that allows it to be combined with operational office furnishings. The creation of a Panky configuration entails 3 simple steps, shown hereafter: choose the frame, available in 3 lengths; compose the sofa with cushions, cushions with back and/or armrest, tops; and finally join up the composition with 45° or 90° connections, whether composed of service tops or cushions.

Panky è il sistema di sedute modulare e personalizzabile per arredare gli spazi dedicati all'attesa e all'accoglienza, basato sulla struttura a cavalletto 2027 che consente l'abbinamento con gli arredi operativi dell'ufficio. La creazione di una configurazione si svolge in 3 semplici step, riportati di seguito: scegliere la struttura, disponibile in 3 lunghezze; comporre il divano con cuscini, cuscini con schienale e/o bracciolo, piani; ed infine collegare la composizione con connessioni a 45° o 90°, siano esse realizzate con piani di servizio o cuscini.

POWER UNIT / UNITÀ DI ELETTRIFICAZIONE

The Power Unit includes a power socket (Schuko), a USB type A+C port and 2meter connection cable. Thanks to its stand-alone base, the power unit can be fixed by screws or can be placed anywhere on the worktop without any limits, allowing the user to get the power wherever is needed. Thanks to a suspension bracket the power unit can be easily mounted upside-down the worksurface, in order to keep free your desk.

Il sistema di elettrificazione da scrivania include una presa energia (Schuko), le porte USB A+C. e due metri di cavo di connessione. La sua base d'appoggio consente di essere fissata con viti o posizionata senza alcun vincolo al piano, offrendo la libertà di utilizzo ovunque ci sia una esigenza di collegamento. Il fissaggio sotto piano per mezzo di un'apposita staffa permette di liberare le superfici d'appoggio, in questo modo si può sfruttare al massimo lo spazio della superficie di lavoro.
